

Name & email supervisor(s):

Dr Christine Johnson

Length and dates of internship:

One month. June 2024. Some flexibility of start and end date.

Host department:

Faculty of Medicine & Health Sciences, University of Nottingham

How will the internship be conducted:

- In person at the university
- Virtual/ from home
- Both are possible, depending on preference of student

Title internship project:

Digital Consultations: What educational resources would be helpful to undergraduate students?

Summary of the internship project: *(max 250 words, can include hyperlinks to further information) Digital Consultations have been used for some time but especially during and since the pandemic, in all specialities. Recent student research has revealed a dearth of educational materials to support the understanding and confidence of medical students. This project would be to work with colleagues from Primary Care education and start to describe and create relevant resources. Although nested within primary Care the learning is transferable across many specialities.*

Learning objectives:

To describe existing resources both within Nottingham
Compare such resources from other medical schools
Create educational packages within Xerte or similar tools
Work alongside course leads and other educational colleagues

Any further information:

Nottingham has a good history of supporting SPCR Internship projects and are flexible to student suggestions. We look forward to working with you.
