

## **Nottingham SPCR internship projects 2025**

<b>Name &amp; email supervisor(s):</b> Dr Julie Carson ( <a href="mailto:Julie.carson@nottingham.ac.uk">Julie.carson@nottingham.ac.uk</a> ) Professor Jaspal Taggar ( <a href="mailto:Jaspal.taggar@nottingham.ac.uk">Jaspal.taggar@nottingham.ac.uk</a> )
<b>Length and dates of internship:</b> Flexible, any 4-week period starting June 9 <sup>th</sup> (2025), onwards.
<b>Host department:</b> Faculty of Medicine & Health Sciences, University of Nottingham
<b>How will the internship be conducted:</b>  <input checked="" type="checkbox"/> In person at the university – with some days from home if this is students’ preference <input type="checkbox"/> Virtual/ from home <input type="checkbox"/> Both are possible, depending on preference of student
<b>Title internship project:</b> Primary Care Undergraduate Education – Quality Improvement
<b>Summary of the internship project:</b> <i>(max 250 words, can include hyperlinks to further information)</i> This 4-week internship provides undergraduate students with a holistic experience in primary care education. Hosted by the University’s Primary Care Education Unit, the aim is to develop students’ understanding of medical education, teaching methodologies, and quality improvement in healthcare education. Throughout the internship, students will shadow faculty members, observing how primary care teaching is delivered to medical students. They will gain insight into curriculum design and innovative teaching methods. Additionally, students will actively participate in delivering educational sessions, allowing them to develop their own teaching skills under supervision. A key component is involvement in a Quality Improvement (QI) exercise, where students will assess an aspect of the education unit’s teaching practices or resources. Working collaboratively, they will identify areas for improvement, gather feedback, and propose practical recommendations, enhancing their skills in critical thinking, problem-solving, and teamwork. By the end of the internship, students will have a deeper appreciation of primary care education, an improved ability to engage in medical teaching, and hands-on experience in quality improvement. This program is ideal for those interested in medical education, academic careers, or leadership roles in healthcare.
<b>Learning objectives:</b> <ul style="list-style-type: none"><li>• Develop Teaching and Communication Skills</li><li>• Understand Principles of Medical Education</li><li>• Develop and apply Quality Improvement Methodologies</li></ul>
